OMB Control Number: 0694-0119

Expiration Date: September 30, 2025

U.S. CIVIL SPACE INDUSTRIAL BASE ASSESSMENT

SCOPE OF ASSESSMENT

The U.S. Department of Commerce, Bureau of Industry and Security (BIS), Office of Technology Evaluation, in coordination with the National Aeronautics and Space Administration (NASA) and the National Oceanic and Atmospheric Administration (NOAA) is conducting a survey and assessment of organizations affiliated with NASA, NOAA, and the broader U.S. Civil Space Industrial Base (CSIB). The resulting data will help identify the structure and interdependencies of organizations that participate in the CSIB and identify their associated supply chains. This effort will also aid NASA and NOAA's ability to understand and respond to supply chain deficiencies, such as supply chain disruptions and diminishing manufacturing sources and material shortages (DMSMS), foreign sourcing and dependency, financial performance, cyber security incidents, use of critical minerals and materials, COVID-19 pandemic impacts, and other challenges facing the CSIB.

RESPONSE TO THIS SURVEY IS REQUIRED BY LAW

A response to this survey is required by law under the authority and provisions of the Defense Production Act of 1950 (DPA), as amended, and Executive Order 13603. Failure to respond can result in a maximum fine of \$10,000, imprisonment of up to one year, or both (50 U.S.C. § 4555). Information furnished herein is deemed confidential and will not be published or disclosed except in accordance with Section 705(d) of the DPA (50 U.S.C. § 4555). Section 705(d) prohibits the publication or disclosure of this information unless the President determines that its withholding is contrary to the national defense (50 U.S.C. § 4555). Information will not be shared with any non-government entity, other than in aggregate form. The information will be protected pursuant to the appropriate exemptions from disclosure under the Freedom of Information Act (FOIA), should it be the subject of a FOIA request.

Notwithstanding any other provision of law, no person is required to respond to nor shall a person be subject to a penalty for failure to comply with a collection of information subject to the requirements of the Paperwork Reduction Act unless that collection of information displays a currently valid OMB Control Number.

BURDEN ESTIMATE AND REQUEST FOR COMMENT

Public reporting burden for this collection of information is estimated to average 16 hours per response, including the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information. Send comments regarding this burden estimate or any other aspect of this collection of information to BIS Information Collection Officer, Room 6883, Bureau of Industry and Security, U.S. Department of Commerce, Washington, D.C. 20230, and to the Office of Management and Budget, Paperwork Reduction Project (OMB Control No. 0694-0119), Washington, D.C. 20503.

BUSINESS CONFIDENTIAL - Per Section 705(d) of the Defense Production Act

	BUSINESS CONFIDENTIAL - Per Section 705(d) of the Defense Production Act

Your organization is required by law to complete this survey of the civil space industrial base supply chain, affiliated systems and subsystems, including related products and services. This effort will aid NASA, NOAA, and the USG in understanding and responding to supply chain deficiencies, such as supply chain disruptions and diminishing manufacturing sources and material shortages (IOMSMS), foreign sourcing and dependency, financial performance, cyber security incidents, use of critical minerals and materials. COVID-19 pandemic impacts, and other challenges facing the CSIB. Your organization has been identified as a direct or indirect supplier to NASA, NOAA or the civil space industrial base meaning as a prime contractor, subcontractor or as part of their multi-ties or the complete days of the complete days or intermediate material provider, distributor, reseller, integrator, software developer, quality or test providers, manufacturer, small business, non-profit, shoratory, university, FFRDC, etc. Complete the survey using the Microsoft Excel file downloaded from the secure Census Bureau portal: https://espond.census.gov/csib To improve internal coordination and overall reporting, a PDF version of the survey is available on the portal od internal data collection. The portal will only accept Excel submissions. Respond to every question. Surveys that are not fully completed will be returned for completion. Use the comment boxes at the bottom of every section to provide any supplemental information. Make sure to record a complete answer in the cell provided, even if the cell does not appear to expand to fit all the information. Refer to the "Definitions" section while completing the survey. Sections 2a-2g must be completed before proceeding to subsequent parts of the survey as answers inform menu options in later survey sections. DO NOT CUT AND PASTE RESPONSES WITHIN THIS SURVEY. Inputs to the survey are made by keyboard responses or use of a drop-down menu. The use of cut and paste can corrupt the file.	Previous P

BUSINESS CONFIDENTIAL - Per Section 705(d) of the Defense Production Act		BUSINESS CONFIDENTIAL - Per Section 705(d) of the Defense Production Act

Term	DEFINITIONS Definition
Additive Manufacturing	A process of joining materials to make objects from 3D model data, usually layer upon layer, as opposed to subtractive manufacturing technologies.
Advanced Materials	Materials with engineered properties created through the development of specialized processing and synthesis technology, including ceramics, high value-added metals, electronic materials, composites, polymers, and biomaterials.
Applied Research	A systematic study to gain the knowledge or understanding necessary to determine the means by which a recognized and specific need may be met. The activity includes work leading to the production of useful materials, devices and systems or methods, including design development and improvement of prototypes and new processes.
Approved Item	A DMSMS resolution in which the obsolescence issue is resolved by the use of items already approved on the drawing and still in production.
Artificial Intelligence (AI)	The ability of machines to perform tasks that normally require human intelligence.
Authorizing Official	Executive officer of the organization or business unit or other individual who has the authority to execute this survey on behalf of the organization.
Basic Research	Systematic, scientific study directed toward greater knowledge or understanding of the fundamental aspects of phenomena and of observable facts.
Blockchain	A decentralized, distributed ledger that records the provenance of a digital asset.
Brute Force cyberattack	A method of accessing an obstructed device through attempting multiple combinations of numeric/alphanumeric passwords.
Capability	The ability to provide the product or service within 12 months in typical business conditions.
Civil Space	Non-military/DOD space related work supporting primarily NASA and NOAA and to a lesser extent Federal Aviation Administration, Federal Communications Commission, and the Department of Energy. For instance, the civil space industrial base goes beyond prime contractors and commercial companies to include federally-funded research and development centers (FFRDCs), universities, and laboratories.
Cloud Computing	The delivery of computing services—including servers, storage, databases, networking, software, analytics, and intelligence—over the Internet ("the cloud").
Code/SQL Injection	A type of cyberattack that looks for web sites that pass insufficiently-processed user input to database back-ends.
Commercial and Government Entity (CAGE) Code	An alphanumeric CAGE code identifies companies doing or wishing to do business with the U.S. Federal Government. The code is used to support mechanized government systems and provides a standardized method of identifying a given facility at a specific organization. Find CAGE codes at https://cage.dla.mil
Commercialization	The process of developing products, processes, technologies, or services and the production and delivery (whether by the originating party or others) the products, processes, technologies, or services for sale to or use by the federal government or commercial markets.
Commercially Sensitive Information	Privileged or proprietary information which, if compromised through alteration, corruption, loss, misuse, or unauthorized disclosure, could cause serion harm to the information's owners.
Complex Substitute	A DMSMS resolution in which the replacement item that has different specifications but requires no modification of the source product or the NHA, is researched and validated. The substitute may be the result of a redefined military requirement.
Component	Any raw material, substance, piece, part, software, firmware, labeling, or assembly which is intended to be included as part of the finished, packaged, a labeled device.
Contract	A legal instrument providing for the purchase, lease, or barter of property or services for the direct benefit of the U.S. Government. (SOURCE DOS/USAID, FAH, 14 FAH 2 H 124.1) Note that for the purposes of this survey, purchase orders should not be considered contracts.
Cost Plus Contract	A cost-reimbursement contract that provides for payment to the contractor of a negotiated fee that is fixed at the inception of the contract. The fixed fee does not vary with actual cost, but may be adjusted as a result of changes in the work to be performed under the contract.
Counterfeit	A part that is not genuine because it 1) is an unauthorized copy, 2) does not conform to original manufacturer design, model, and/or performance standards; 3) is not produced by the original manufacturer or is produced by unauthorized contractors; 4) is an off-specification, defective, or used OE product sold as "new" or working; or 5) has incorrect or false markings and/or documentation.
Critical Minerals	For the purposes of this survey, critical minerals are the 35 minerals identified by the U.S. Geological Survey as a non-fuel mineral or mineral material that is essential to the economic and national security of the United States, has a supply chain vulnerable to disruption, and serves an essential function the manufacturing of a product, the absence of which would have significant consequences for the economy or national security. For more information, visit https://www.usqs.gov/news/national-news-release/us-geological-survey-releases-2022-list-critical-minerals
Critical Technology	In terms of this survey, critical technology are "at risk" industrially-supplied building block items used for a variety of NASA ground and space systems
Customer	An entity to which an organization directly delivers the product or service that it produces. A customer may be another organization or another facility owned by the same parent organization. The Customer may be the end user for the item but often can be the immediate link in the supply chain, adding additional value before transferring the item to yet another customer.
Cyber Incident	Actions taken through the use of an information system or network that result in an actual or potentially adverse effect on an information system, network and/or the information residing therein.
Cybersecurity	The body of technologies, processes, and practices designed to protect networks, computers, programs, and data from attack, damage, or unauthorize access.
Data Universal Numbering System (DUNS)	A nine-digit numbering system that uniquely identifies an individual businesses. Find DUNS numbers at http://fedgov.dnb.com/webform
DD Form 254	The intention of a DD Form 254 is to convey security requirements, classification guidance and provide handling procedures for classified material received and/or generated on a classified contract. The Federal Acquisition Regulation (FAR) requires that a DD Form 254, Contract Security Classification Specification, be integrated in each classified contract. The DD Form 254 provides the contractor (or a subcontractor) security requirements and the classification guidance that is necessary to execute a classified contract.
Deemed Export	The release of controlled technology or information to a foreign person in the U.S. This includes technology made available to foreign nationals for vis inspection, exchanged orally, and made available by practice or application under the guidance of persons with knowledge of the technology.
Defense-Related	Any activity/component/subsystem/test/product/service that contributes to a government defense program, whether directly or indirectly, or is used to provide any such item that contributes to a government defense program.
Denial of Service (DoS/DDoS)	The prevention of authorized access to resources or the delaying of time-critical operations (Time-critical may be milliseconds or it may be hours, depending upon the service provided).
Development of a New Item or Source	A DMSMS resolution in which a replacement product is developed that meets the requirements of the original product without affecting the NHA. The product may be developed by emulating, reverse engineering, designing a replacement based on the original manufacturing designs and processes, designing a different product based on the original or new requirements. The manufacturing source for the new item may be the original manufacturer a new source.
Digital Engineering	The use of models and computer resources together to do engineering tasks, such as design, analysis, prototyping and experimentation.
Direct Support	Selling to or engaging in a direct contract with the entity in question.
Distributed Ledger Technology	Refers to the technological infrastructure and protocols that allows simultaneous access, validation, and record updating in an immutable manner across network that's spread across multiple entities or locations.
Diversity, Equity, Inclusion, and Accessibility (DEIA)	1) Diversity encompasses the full variety of communities, identities, races, ethnicities, backgrounds, abilities, cultures, and beliefs of all people, including those from underserved communities. 2) Equity defined means the consistent and systematic provision of fair, just, and impartial treatment to all individuals, including individuals who belong to underserved communities that have been denied surtreatment. 3) Inclusion involves the recognition, appreciation, and use of the talents and skills of employees of all backgrounds. 4) Accessibility denotes the capability for full and independent use by all people, including people with disabilities, of technology, programs, and services through inclusive design, construction, development, and maintenance of facilities.
Edge Computing	Computing and processing that can occur at the edge of the IT enterprise, often at the data collection source itself.
Encryption Technologies	Technology that converts information to ciphertext that can only be deciphered by authorized users that have the key. Types of encryptions include, but a not limited to, Symmetric Encryption, Asymmetric Encryption, Data Encryption Standard (DES), Triple Data Encryption Standard (3DES), Rivest-Shan Adleman (RSA), Advanced Encryption Standard (AES), Encryption in the Cloud, and End-to-End Encryption.
Export Administration Regulation (EAR)	U.S. Government regulation designed to control the export of "dual-use" goods, that is, those that have both commercial and military applications, administered by the U.S. Department of Commerce.
Extension of Product Support	A DMSMS resolution in which the supplier is incentivized to continue providing the obsolete items. This may involve long-term agreements to procure specific quantities of items. One-time costs may be associated with setting up this resolution. Those costs should be included in any cost and cost avoidance by being proactive calculations. For software, long-term licensing and/or support agreements are obtained.
External Funding	Funding being sourced external to or outside the organization; capital or funds (e.g., loans, grants, etc.) to support research and development that are derived from a federal, state, or local agency, a foundation, industry, or another external source.
Facility	For the purpose of this survey, a facility is an area within an organization defined by a single CAGE code. An organization's physical organization may contain multiple facilities.
Federal Acquisition Regulation (FAR)	The Federal Acquisition Regulations System is established for the codification and publication of uniform policies and procedures for acquisition by a executive agencies. The Federal Acquisition Regulations System consists of the Federal Acquisition Regulation (FAR), which is the primary docume and agency acquisition regulations that implement or supplement the FAR.
Full Time Equivalent (FTE) Employees	Employees who work for 40 hours in a normal work week. Convert part-time employees into "full time equivalents" by taking their work hours as a fractic 40 hours.
Hypersonics	Vehicles or weapons that travel faster than Mach 5 (~3,800mph) and have the capability to maneuver during the entire flight.
Indefinite-Delivery, Indefinite Quantity (IDIQ) Contract	This type of contract provides for an indefinite quantity of services for a fixed time. They are used when the government can't determine, above a specifi minimum, the precise quantities of supplies or services that it will require during the contract period.
Innovation	Applying technology, tools, or processes in a new or different way that helps perform the mission better, cheaper, or faster. That is, it saves resources, time or money, or enables the user to perform their mission better.
Internal Funding	Capital or funds to support research and development that are derived from retained earnings, profits, or other existing financial resources
	Regulation designed to control the export of defense and military-related technologies, administered by the U.S. Department of State.
International Traffic in Arms Regulation (ITAR)	
	A system of objects, as well as even people and animals, who carry unique identifiers and can transfer data over the internet without any human-to-hum or human-to-computer interaction.
International Traffic in Arms Regulation (ITAR) Internet of Things (IoT) Joint Venture Labor-Hour Contract	or human-to-computer interaction.
Internet of Things (IoT) Joint Venture Labor-Hour Contract Life of Need (LON) Buy	or human-to-computer interaction. A joint commercial enterprise taken by two or more distinct business entities. A labor-hour contract is a variation of the time-and-materials contract, differing only in that materials are not supplied by the contractor. A DMSMS resolution in which a sufficient quantity of the item is purchased to sustain the product until its next technology refreshment or the
Internet of Things (IoT) Joint Venture Labor-Hour Contract Life of Need (LON) Buy	A joint commercial enterprise taken by two or more distinct business entities. A labor-hour contract is a variation of the time-and-materials contract, differing only in that materials are not supplied by the contractor. A DMSMS resolution in which a sufficient quantity of the item is purchased to sustain the product until its next technology refreshment or the discontinuance of the host assembly. Because this resolution uses an approved item, no testing or drawing changes are required. The source of support can be residual stock from the original manufacturer, shelf stock from distributors, sponsor-owned material, and so forth. Communication technology with the ability to communicate with spacecraft, send commands or software updates, track location and receive telemetry,
Internet of Things (IoT) Joint Venture Labor-Hour Contract Life of Need (LON) Buy Long Range Deep Space Communication	A joint commercial enterprise taken by two or more distinct business entities. A labor-hour contract is a variation of the time-and-materials contract, differing only in that materials are not supplied by the contractor. A DMSMS resolution in which a sufficient quantity of the item is purchased to sustain the product until its next technology refreshment or the discontinuance of the host assembly. Because this resolution uses an approved item, no testing or drawing changes are required. The source of support of the product until its next technology material, and so forth. Communication technology with the ability to communicate with spacecraft, send commands or software updates, track location and receive telemetry, images and scientific data across large distances from earth. According to NASA, deep space is considered any distance further than the moon, rough
Internet of Things (IoT) Joint Venture Labor-Hour Contract Life of Need (LON) Buy Long Range Deep Space Communication Malware	A joint commercial enterprise taken by two or more distinct business entities. A labor-hour contract is a variation of the time-and-materials contract, differing only in that materials are not supplied by the contractor. A DMSMS resolution in which a sufficient quantity of the item is purchased to sustain the product until its next technology refreshment or the discontinuance of the host assembly. Because this resolution uses an approved item, no testing or drawing changes are required. The source of support on the original manufacturer, shelf stock from distributors, sponsor-owned material, and so forth. Communication technology with the ability to communicate with spacecraft, send commands or software updates, track location and receive telemetry, images and scientific data across large distances from earth. According to NASA, deep space is considered any distance further than the moon, roug 384,000km. Hardware, firmware, or software that is intentionally included or inserted in a system for a harmful purpose.
Internet of Things (IoT) Joint Venture Labor-Hour Contract Life of Need (LON) Buy Long Range Deep Space Communication Malware Man in the Middle (MitM)	A joint commercial enterprise taken by two or more distinct business entities. A labor-hour contract is a variation of the time-and-materials contract, differing only in that materials are not supplied by the contractor. A DMSMS resolution in which a sufficient quantity of the item is purchased to sustain the product until its next technology refreshment or the discontinuance of the host assembly. Because this resolution uses an approved item, no testing or disaving changes are required. The source of supplicable to sustain the product until its next technology refreshment or the discontinuance of the host assembly. Because this resolution uses an approved item, no testing or disaving changes are required. The source of supplicance have been entitled in the resolution technology with the ability to communicate with spacecraft, send commands or software updates, track-location and receive telemetry, images and scientific data across large distances from earth. According to NASA, deep space is considered any distance further than the moon, roug 384,000km. Hardware, firmware, or software that is intentionally included or inserted in a system for a harmful purpose. A cyberattack where the adversary positions himself in between the user and the system so that he can intercept and alter data traveling between them. The North American Industry Classification System (NAICS) is the standard used by Federal statistical agencies in classifying business establishme for the purpose of collecting, analyzing, and publishing statistical data related to the U.S. business economy.
Internet of Things (IoT) Joint Venture Labor-Hour Contract Life of Need (LON) Buy	A joint commercial enterprise taken by two or more distinct business entities. A labor-hour contract is a variation of the time-and-materials contract, differing only in that materials are not supplied by the contractor. A DMSMS resolution in which a sufficient quantity of the item is purchased to sustain the product until its next technology refreshment or the discontinuance of the host assembly. Because this resolution uses an approved item, no testing or drawing change are required. The source of support on the residual stack from the original manufacturer, shelf stock from distributors, sponsor-owned material, and so forth. Communication technology with the ability to communicate with spacecraft, send commands or software updates, track-location and receive telemetry, images and scientific data across large distances from earth. According to NASA, deep space is considered any distance further than the moon, roug 384,000km. Hardware, firmware, or software that is intentionally included or inserted in a system for a harmful purpose. A cyberattack where the adversary positions himself in between the user and the system so that he can intercept and after data traveling between them. The North American Industry Classification System (NAICS) is the standard used by Federal statistical agencies in classifying business establishme for the purpose of collecting, analyzing, and publishing statistical data related to the U.S. business economy.

Page 4 of 32

s	The technology behind machines that are programmable by a computer and which can carry out a complex series of actions automatically.
	An intangible product (contrasted to a good, which is a tangible product). Services typically cannot be stored or transported, even though other sources with equivalent technical know-how and production capability may exist.
Substituta	A DMSMS resolution in which the item is replaced with an existing item that meets all requirements without modification to either the item or its NHA and requires only minimal qualification. Associated costs are largely administrative. This is sometimes referred to as an "alternate."
SOURCE	An organization that is designated as the only accepted source for the supply of parts, components, materials, or services, even though other sources with equivalent technical know-how and production capability may exist.
usiness Innovation Research (SBIR) Contracts	A highly competitive program that encourages domestic small businesses to engage in Federal Research/Research and Development (R/R&D) that has the potential for commercialization. Through a competitive awards-based program, SBIR enables small businesses to explore their technological potential and provides the incentive to profit from its commercialization. By including qualified small businesses in the nation's R&D arena, high-tech innovation is stimulated and the United States gains entrepreneurial spirit as it meets its specific research and development needs. Find more information about SBIR at: https://www.sbir.gov/about/about-sbir
usiness TechnologyTransfer (STTR) Contracts	A program that expands funding opportunities in the federal innovation research and development (R&D) arena. Central to the program is expansion of the public/private sector partnership to include the joint venture opportunities for small businesses and nonprofit research institutions. The unique feature of the STTR program is the requirement for the small business to formally collaborate with a research institution in Phase I and Phase II. STTR's most important role is to bridge the gap between performance of basic science and commercialization of resulting innovations. Find more information about STTR at: https://www.sbir.gov/about/about-sttr#three
I Irca	An organization that is the only source for the supply of parts, components, materials, or services. No alternative U.S. or non-U.S. based suppliers exist other than the current supplier.
Related	Any product, service, or object that can be a) used in or launched into space; b) used to directly or indirectly support space applications from Earth; and/or c) used to manufacture any product that is used in space or directly supports space applications. The product, service, or object does not have to be specifically intended to support space applications.
Norkforce	STEM is the acronym for Science, Technology, Engineering, and Mathematics. The STEM workforce not only includes occupations that are historically known to require science and engineering skills and expertise (e.g., life sciences, physical sciences, engineering, mathematics and computer sciences, social sciences, and health care) but also occupations that require STEM skills but are not historically considered STEM occupations (e.g., installation, maintenance, and repair; construction trades; and production occupations).
omputing	A class of extremely powerful computers used primarily for scientific and engineering work requiring exceedingly high-speed computations. The performance of a supercomputer is commonly measured in floating-point operations per second (FLOPS) instead of million instructions per second (MIPS). Common applications for supercomputers include testing mathematical models for complex physical phenomena or designs, such as climate and weather, evolution of the cosmos, nuclear weapons and reactors, new chemical compounds (especially for pharmaceutical purposes), and cryptology.
	An entity from which your organization obtains inputs. A supplier may be another firm with which you have a contractual relationship, or it may be another facility owned by the same parent organization. The inputs may be goods or services.
Chain Risk Management (SCRM) Program	A coordinated effort within an organization to help identify, monitor, detect and mitigate threats to the supply chain.
log v Layonomv	NASA's system that identifies, organizes, and communicates technology areas into 17 distinct technical discipline-based taxonomies relevant to advancing the agency's mission.
nd_Materials (Contracts	A time-and-materials contract provides for acquiring supplies or services on the basis of either direct labor hours at specified fixed hourly rates that include wages, overhead, general and administrative expenses, and profit; or the actual cost for materials.
Entity Identifier (UEI)	The Unique Entity ID or UEI is a 12-character alphanumeric ID assigned to an entity by SAM.gov. Find UEIs at https://sam.gov/content/home
ny Exploit	A cyberattack that exploits a previously unknown hardware, firmware, or software vulnerability.

Section 2a: Technology Taxonomy: Products and Services

Next Dogo

For Section 2a, identify <u>all</u> products and/or services that your organization manufactures, distributes, performs research and development, and/or otherwise provides or has the capability is defined as having the ability to provide a product or service. Identify each Technology Taxonomy subarea in which your organization has capabilities (only affirmative responses required). **NOTE:** If you selected "Manufacturer" as a Bussiness Type in Section 1a, review TX12.4 - Manufacturing in Section 2f.

For more information on the NASA-created Technology Taxonomy: https://www.nasa.gov/offices/oct/taxonomy/index.html

For Sections 2b-2g, provide information on the individual type of products or services within each indicated subarea for which your organization has capabilities. For descriptions of the technology taxonomy subareas, select the corresponding hyperlink. Complete the subareas were you indicate capability whether that is the current ability to product and/or provide services, products and/or services and/or provide services, products and/or services and/or serv

If you do not reach 50 capabilities with the above criteria, please prioritize your remaining capabilities using criteria of your own choosing (e.g., revenue, current supplier and/or customer info, criticality, technology maturity, etc.), and explain why you selected said criteria in the comment box at the bottom of the tab. Section 2a should list every capability. Only Sections 2b-g and 3 should be limited to your organization's top 50 capabilities.

Technology Taxonomy Area	Capability	Technology Taxonomy Area	Capability	Technology Taxonomy Area	Capability	
TX01 - Propulsion Systems		TX06.3 - Human Health and Performance		TX12.2 - Structures		
TX01.1 - Chemical Propulsion Systems	Space Related	TX06.4 - Environmental Monitoring, Safety, and Emergency Response		TX12.3 - Mechanical Systems

K01.4.4 - Other Advanced Propulsion Approaches K01.4.XX - (Other)		TY02 - Flight Com	nputing and Avionics	(Other)		Tellurium Terbium Thulium	
X02.1 - Avionics Component Technologies	Product/Service Capability	Support of NASA	Support of NOAA	Product/Service Description	R&D	Tin Titanium	Primary HTSUS 10-Digit Cod
X02.1.1 - Radiation Hardened Extreme Environment Components and Implementations (ex: Radiation mitigation devices, ad-hard/tolerant data processing, Nanoelectronics based memory devices, etc.)						Tungsten Vanadium	
X02.1.2 - Electronic Packaging and Implementations (ex: Additively manufactured electronic packaging, Chip-on-board chnologies, etc.) X02.1.3 - High Performance Processors (ex: Scalable, multi-core processors, Digital signal processors (DSP), Graphics						Ytterbium Yttrium	
ocessing units (GPU), etc.) X02.1.4 - High Performance Memories (ex: Rad-hard high-density on-board memory, Double Data Rate (DDR3/4),						Zinc Zirconium	
agnetoresistive Random Access Memory (MRAM), etc.) X02.1.5 - High Performance Field Programmable Gate Arrays (FGPA) (ex: Rad-hard/tolerant FPGAs, Techniques for FPGA						1	
idiation hardening, etc.) X02.1.6 - Radiation Hardened ASIC Technologies (ex: System-on-a-chip (SoC) devices, Intellectual property (IP) cores, etwork interface ASICs, etc.)							
X02.1.7 - Point-of-Load Power Converters (ex: Fault-tolerant point-of-load converters, Multi-output point-of-load converters, ic.)							
X02.1.8 - Wireless Avionics Technologies (ex: RFID-based sensors, Wi-Fi-based sensors, Wireless wearable sensors for nonitoring astronauts, etc.) X02.1.XX - (Other)				(Other)			
X02.2 - Avionics Systems and Subsystems	Product/Service Capability	Support of NASA	Support of NOAA	Product/Service Description	R&D	Primary Critical Mineral	Primary HTSUS 10-Digit Cod
X02.2.1 - Spacecraft Command and Data Handling Systems (C&DH) (ex: Data recorders and storage systems, Health lanagement systems, Crew input and display systems, etc.)							
X02.2.2 - Aircraft Avionics Systems (ex: Autopilots, Flight deck management systems, Terrain awareness/warning systems, ollision avoidance systems, etc.) X02.2.3 - Vision and Virtual/Augmented Reality Avionics (ex: External visions systems for safe take-off/landing, Integrated							
ata and real-time imaging into heads-up displays, etc.) X02.2.4 - Low Power Embedded Computer Systems (ex: Real-time processor boards/systems, Instrument or peripheral							
mbedded processing systems, etc.) X02.2.5 - High Speed Onboard Interconnects and Networks (ex: Gigabit Ethernet, Fiber optic network waveguide, etc.)							
X02.2.6 - Data Acquisition Systems (ex: Structural Health m=Monitoring and Thermal Health Monitoring (SHM/THM) system tegration, Sensor webs, High analog-bandwidth/sampling rate, etc.)							
X02.2.7 - Data Reduction Hardware Systems (ex: Data duplication software, Radio frequency (RF) compression, etc.)							
X02.2.8 - Use of Advanced Commercial-off-the-Shelf (COTS) Technologies (ex: Uses of advanced commercial icrocircuits, semiconductors, and passives; Implementation of commercial processors, FPGAs, memories, Analog-to-igital/Digital-to-Analog Converters (ADC/DAC), etc.)							
X02.2.XX - (Other) X02.3 - Avionics Tools, Models, and Analysis	Product/Service Capability	Support of NASA	Support of NOAA	(Other) Product/Service Description	R&D	Primary Critical Mineral	Primary HTSUS 10-Digit Coo
X02.3.1 - Electronics Development Tools (ex: Automated hardware development toolsets, Printed circuit board (PCB)	Product/Service Capability	Support of NASA	Support of NOAA	Froduct/Service Description	NaD	Filliary Chical Milleral	Filliary H1303 10-Digit Col
x02.3.2 - Space Radiation Analysis and Modeling (ex: IRENE, ESP, and PSYCHIC environmental models, MULASSIS,							
onte Carlo N-Particle/ Monte Carlo N-Particle eXtended (MCNP/MCNPX), NOVICE transport codes, etc.) X02.3.3 - Avionics Reliability and Fault-Tolerance Analysis and Modeling (ex: Fault tolerance modeling and coverage							
stimation, Fault Injectors, etc.) K02.3.4 - Electromagnetic Environment Effects (ex: E3 2D and 3D modeling capability, including Finite Difference Time							
omain (FDTD) and integral electromagnetic solvers, with aerodynamic and thermal environment interfaces) (02.3.XX - (Other)		TX03 - Aerospace Po	wer and Energy Storage	(Other)			
(03.1 - Power Generation and Energy Conversion	Product/Service Capability	Support of NASA	Support of NOAA	Product/Service Description	R&D	Primary Critical Mineral	Primary HTSUS 10-Digit Cod
(03.1.1 - Photovoltaic (ex: 25-150 kW-class solar arrays, Reliably retractable solar arrays, etc.) (03.1.2 - Heat Sources (ex: Conventional radioisotope, fission, or solar-thermal heat sources linked with novel aspects of							
eat collection such as heat pipes, heat pumps, etc.) K03.1.3 - Static Energy Conversion (ex: Enhanced multi-mission radioisotope thermoelectric generators, Thermionic enerators)							
K03.1.4 - Dynamic Energy Conversion (ex: Advanced Stirling radioisotope generator, Brayton and Rankine cycle generators th solar, fission, or chemical energy sources, etc.)							
X03.1.5 - Electrical Machines (ex: High-efficiency, high-power motors/generators for electric aircraft, Wind turbines, etc.) X03.1.6 - Other Advanced Concepts for Generating/Converting Power (ex: Electrodynamic tether energy harvesting, Nuclear							
ermionic avalanche cells, Alpha/beta voltaics, etc.) (03.1.XX - (Other)				(Other)			
(03.2 - Energy Storage	Product/Service Capability	Support of NASA	Support of NOAA	Product/Service Description	R&D	Primary Critical Mineral	Primary HTSUS 10-Digit Co
(03.2.1 - Electrochemical: Batteries (ex: High-specific-energy, Extreme environment energy storage, Flow batteries, etc.)							
(03.2.2 - Electrochemical: Fuel Cells (ex: Hydrogen/oxygen-based regenerative fuel cells, Solid oxide fuel cells, etc.) (03.2.3 - Electrochemical: Advanced Concepts for Energy Storage (ex: Superconducting bearings, Solar energy stored as							
gh-energy-density chemical fuels, etc.) K03.2.XX - (Other)				(Other)			
X03.3 - Power Management and Distribution X03.3.1 - Management and Control (ex: Autonomous fault detection, isolation, and recovery (FDIR) algorithms and	Product/Service Capability	Support of NASA	Support of NOAA	Product/Service Description	R&D	Primary Critical Mineral	Primary HTSUS 10-Digit Co
chnologies for complex power systems, Heirarchical and distributed control of a power system, etc.) X03.3.2 - Distribution and Transmission (ex: High-conductivity carbon nanotube wire, All forms of wireless power							
ansmission (magnetic, radio frequency, and optical), etc.) X03.3.3 - Electrical Power Conversion and Regulation (ex: Modular power converters, Electrical propulsion power							
ocessing units (power electronics related to electric propulsion), etc.) K03.3.4 - Advanced Electronic Parts (ex: High-voltage semiconductors and passive components, Extreme radiation- urdened power distribution, etc.)							
X03.3.XX - (Other)				(Other)

etc.) TX06.2.4 - Decompression Sickness (DSCS) Mitigation (ex: Probabilistic DCS risk models, Reduced ppN2 vehicle							
atmospheres, etc.) TX06.2.XX - (Other)				(Other)			
TX06.3 - Human Health and Performance TX06.3.1 - Medical Diagnosis and Prognosis (ex: Emerging screening technologies, Preventative countermeasures, Sterile	Product/Service Capability	Support of NASA	Support of NOAA	Product/Service Description	R&D	Primary Critical Mineral	Primary HTSUS 10-Digit Code
fluid generation, etc.) TX06.3.2 - Prevention and Countermeasures (ex: Cell/tissue culture, animal models, Water control standards for microbes, probiotic delivery, antimicrobial medications, etc.)							
TX06.3.3 - Behavioral Health and Performance (ex: Psychomotor Vigilance Task (PVT), Objective sleep measures for spaceflight operations, Scheduling software, etc.) TX06.3.4 - Contact-less/Wearable Human Health and Performance Monitoring (ex: Biometric wireless sensors) TX06.3.5 - Food Production, Processing, and Preservation (ex: Bioregenerative food system, Packaged food mass reduction,							
Vegetable cleaning and safety verification, etc.) TX06.3.6 - Long Duration Health (ex: Defining metrics for long-term health, Technologies to enable occupational surveillance, etc.)							
TX06.3.7 - System Transformative Health and Performance Concepts (ex: Autonomous clinical care, Artificial gravity, Bioengineering)							
TX06.3.XX - (Other) TX06.4 - Environmental Monitoring, Safety, and Emergency Response	Product/Service Capability	Support of NASA	Support of NOAA	(Other) Product/Service Description	R&D	Primary Critical Mineral	Primary HTSUS 10-Digit Code
TX06.4.1 - Sensors: Air, Water, Microbial, and Acoustic (ex: Atmosphere quality sensors, Water quality sensor, etc.) TX06.4.2 - Fire: Detection, Suppression, and Recovery (ex: Combustion model in low and partial gravity, Cabin fire: detection							
system, cabin fire extinguisher) TX06.4.3 - Protective Clothing and Breathing (ex: Advanced respirator, Common filtering cartridge mask, etc.) TX06.4.4 - Remediation (ex: Contingency air scrubber, Contingency microbial remediation, etc.)							
TX06.4.XX - (Other) TX06.5 - Radiation	Product/Service Capability	Support of NASA	Support of NOAA	(Other) Product/Service Description	R&D	Primary Critical Mineral	Primary HTSUS 10-Digit Code
TX06.5.1 - Radiation Transport and Risk Modeling (ex: Cancer risk projection model, Degenerative risk projection model, Digital twin, etc.)		··		<u> </u>			
TX06.5.2 - Radiation Mitigation and Biological Countermeasures (ex: Countermeasures for in-flight acute radiation syndrome, Combined pharmaceutical interaction tool, etc.)							
TX06.5.3 - Protection Systems (ex: In-situ passive shielding from and in the spacecraft, Cooling systems for active shielding, etc.) TX06.5.4 - Space Weather Prediction (ex: Tool for all-clear forecasting of Solar Particle Event (SPE) onset, Ensemble							
coronal mass ejection forecasting for mission impact assessment, etc.) TX06.5.5 - Monitoring Technology (ex: Compact biological dosimetry (biodosimetry), Active personal dosimetry for							
Intravehicular activities and extravehicular activities, etc.) TX06.5.XX - (Other)	Dura de sale (Compine Company)	Command of NACA	Compart of NOAA	(Other)	Deb	Driver of Mineral	Drive and LITCUIC 40 Divit Code
TX06.6 - Human Systems Integration TX06.6.1 - Human Factors Engineering (ex: Human physical and cognitive performance models, Integrated human-system	Product/Service Capability	Support of NASA	Support of NOAA	Product/Service Description	R&D	Primary Critical Mineral	Primary HTSUS 10-Digit Code
verification and validation (V&V) methods, etc.) TX06.6.2 - Training (ex: Framework for an integrated training design that supports skill acquisition, retention, and transfer, Just-in-time training capabilities for in-mission or on-the-job initial and refresher training, etc.)							
TX06.6.3 - Habitability and Environment (ex: Integrated habitat support system, Long-duration microgravity workstation and habitat tools, etc.)							
TX06.6.4 - Operations Effectiveness (ex: Operations design for multiple communications time-delay regimes, Control and display design to maximize situational awareness and reduce distraction, etc.)							
TX06.6.5 - Integrated Systems Safety (ex: Integrated risk and hazard analysis tools, System safety taxonomies, etc.) TX06.6.6 - Maintainability and Supportability (ex: Integrated electronic technical manuals, Tool management system, Onboard to since and storage are appropriately asset to the since and storage are also asset to the since are a							
logistics and stowage management system, etc.) TX06.6.XX - (Other)		TX07 - Exploration	n Destination Systems	(Other)			
TX07.1 - In-Situ Resource Utilization	Product/Service Capability	Support of NASA	Support of NOAA	Product/Service Description	R&D	Primary Critical Mineral	Primary HTSUS 10-Digit Code
TX07.1.1 - Destination Reconnaissance and Resource Assessment (ex: Instruments and devices to: detect, locate, and quantify specific surface and subsurface chemical species (such as water or other high-value elements or minerals)							
TX07.1.2 - Resource Acquisition, Isolation, and Preparation (ex: Instruments and devices functioning in the relevant gravity environment to: penetrate, cut, drill, extract, or excavate surface and subsurface regolith that is either resource-bearing or							
inert overburden) TX07.1.3 - Resource Processing for Production of Mission Consumables (ex: Chemical, electrochemical, and biological materials, catalysts, components, and reactors to extract and combine resources to produce end-products (e.g. catalytic							
reactors to produce methane, electrolysis devices to produce oxygen, etc.) TX07.1.4 - Resource Processing for Production of Manufacturing, Construction, and Energy Storage Feedstock Materials (ex: Instruments and devices functioning in the relevant gravity environment, including: production of granular material by grinding, crushing, sorting, and mixing)							
TX07.1.XX - (Other) TX07.2 - Mission Infrastructure, Sustainability, and Supportability	Product/Service Capability	Support of NASA	Support of NOAA	(Other) Product/Service Description	R&D	Primary Critical Mineral	Primary HTSUS 10-Digit Code
TX07.2.1 - Logistics Management (ex: Propellant scavenging, Power scavenged wireless sensor tag systems, Packaging foam, etc.)				<u> </u>			, , , , , ,
TX07.2.2 - In-Situ Manufacturing, Maintenance, and Repair (ex: Design tools configured to accommodate broad-specification feedstock properties into design safety factors and manufacturing tolerances)							
TX07.2.3 - Surface Construction and Assembly (ex: Manufacturing of structural elements using feedstock derived from locally-produced and recycled materials, Assembly of structural and environmental barrier systems from terrestrially-delivered and/or locally-derived elements, etc.) TX07.2.4 - Micro-Gravity Construction and Assembly (ex: On-orbit three dimensional (3D) manufacturing, In-space truss manufacturing, etc.)							
TX07.2.5 - Particulate Contamination Prevention and Mitigation (ex: Passive cleaning, "Tunnels" to minimize regolith transfer during extravehicular activities (EVAs), Failure Isolation, Detection, and Recovery (FIDR), etc.)							
TX07.2.XX - (Other) TX07.3 - Mission Operations and Safety	Product/Service Capability	Support of NASA	Support of NOAA	(Other) Product/Service Description	R&D	Primary Critical Mineral	Primary HTSUS 10-Digit Code
TX07.3.1 - Mission Planning and Design (ex: Software for rapid mission development and analysis, Toolsets for spacecraft design and mission simulation, etc.)							
TX07.3.2 - Integrated Flight Operations Systems (ex: Autonomous crew operations, Advanced ground launch operations for ascent vehicles, etc.) TX07.3.3 - Training (ex: Training methodologies to ensure effective human response when automation/autonomy fail in time-							
critical situations, Data mining algorithms, etc.) TX07.3.4 - Integrated Risk Assessment Tools (ex: Probabilistic Risk Assessment (PRA) toolset) TX07.3.5 - Planetary Protection (ex: Sterilization modalities beyond time/temperature, Biobarriers for whole spacecraft,							
Trajectory analysis, etc.) TX07.3.XX - (Other)				(Other)			
TX08.1 - Remote Sensing Instruments and Sensors	Product/Service Capability	TX08 - Sensor	s and Instruments Support of NOAA	Product/Service Description	R&D	Primary Critical Mineral	Primary HTSUS 10-Digit Code
TX08.1.1 - Detectors and Focal Planes (ex: Backshort Undergrid bolometer arrays, Charge coupled devices, Mercury Cadmium Telluride and Strained Superlattice Arrays, etc.)		··		<u> </u>			
TX08.1.2 - Electronics (ex: Low noise amplifiers, Space cube, Modular Unified Space Technology Avionics for Next Generation missions (MUSTANG), etc.)							
TX08.1.3 - Optical Components (ex: Mirrors, lenses, interferometers, gratings, prisms, and fibers, Active optical elements, etc.) TX08.1.4 - Microwave, Millimeter-, and Submillimeter-Waves (ex: Laser heterodyne and gas correlation radiometers,							
Transmit/receive modules, etc.) TX08.1.5 - Lasers (ex: Pulsed lasers and the electro-optical components that support them like fibers, gratings, crystals,							
laser diodes, electro-optical modulators, nanolasers) TX08.1.6 - Cryogenic/Thermal (ex: Adiabatic demagnetization refrigerators, Cryocoolers, like Stirling refrigerators, Brayton Cycle refrigerators, pulse tube refrigerators, Joule-Thomson coolers, etc.)							
TX08.1.XX - (Other) TX08.2 - Observatories TX08.2.1 - Mirror Systems (ex: Ground metrology and systems, Space cube, Onboard Synthetic Aperture Radar (SAR)	Product/Service Capability	Support of NASA	Support of NOAA	(Other) Product/Service Description	R&D	Primary Critical Mineral	Primary HTSUS 10-Digit Code
processor, etc.) TX08.2.2 - Structures and Antennas (ex: James Webb Space telescope (JWST) deployment system and the JWST sunshade, Soil Moisture Active Passive (SMAP) and NASA-ISRO Synthetic Aperture Radar (NISAR deployable mesh antenna and boom system, etc.) TX08.2.3 - Distributed Aperture (ex: Submillimeter Probe of the Evolution of Cosmic Structure (SPECS), Laser interferometer							
TX08.2.3 - Distributed Aperture (ex: Submillimeter Probe of the Evolution of Cosmic Structure (SPECS), Laser interferometer space antenna) TX08.2.XX - (Other)				(Other)			
TX08.3 - In-Situ Instruments and Sensors	Product/Service Capability	Support of NASA	Support of NOAA	Product/Service Description	R&D	Primary Critical Mineral	Primary HTSUS 10-Digit Code
TX08.3.1 - Field and Particle Detectors (ex: Fast Plasma Instrument (FPI), Dual Electron Sensors (DES), etc.) TX08.3.2 - Atomic and Molecular Species Assessment (ex: Sample Analysis at Mars (SAM), Mars Organic Molecule Analyser (MOMA), Gas chromatographs, etc.) TX08.3.3 - Sample Handling (ex: Drills, The rock abrasion tool (RAT), etc.) TX08.3.4 - Environment Sensors (ex: Temperature, humidity, wind speed and direction, atmospheric pressure, seismic							
Sensors) TX08.3.5 - Electromagnetic Wave-Based Sensors (ex: Strain, temperature, pressure, structure/materials, sensors) TX08.3.6 - Extreme Environments Related to Critical System Health Management (ex: Sensors of temperature, pressure, vibration, electrical current and voltage, torque, mechanical stress and strain, chemicals, and optical or electromagnetic characteristics)							
TX08.3.XX - (Other)				(Other)

environment, etc.) TX12.3.2 - Electro-Mechanical, Mechanical, and Micromechanisms (ex: Fluid transfer and refueling, Provisions for operation in harsh environment, etc.)							
TX12.3.3 - Design and Analysis Tools and Methods (ex: Dynamic behavior modeling) TX12.3.4 - Reliability, Life Assessment, and Health Monitoring (ex: Damage and remaining life prediction techniques,							
Integrated health monitoring systems including embedded sensors, etc.) TX12.3.5 - Certification Methods (ex: Digital probabilistic representation and virtual evaluation of the flight system—including incorporation of testing results—with comprehensive diagnostic and prognostic capabilities to enable efficient development							
and certification and safe, autonomous operation throughout the service life of system) TX12.3.6 - Mechanical Drive Systems (ex: High capacity, high efficiency magnetic materials, Materials that maintain elasticity							
under cryogenic conditions, etc.) TX12.3.7 - Mechanism Life Extension Systems (ex: Long-life bearing/lube system, Cryo long-life actuator, etc.) TX12.3.8 - Docking and Berthing Mechanisms and Fixtures (ex: Crew docking mechanism, Dexterous/long reach robotics,							
Lunar/Mars surface robotic docking mechanism, etc.) TX12.3.XX - (Other)				(Other)			
TX12.4 - Manufacturing	Product/Service Capability	Support of NASA	Support of NOAA	Product/Service Description	R&D	Primary Critical Mineral	Primary HTSUS 10-Digit Code
TX12.4.1 - Manufacturing Processes (ex: Additive manufacturing of metallics and nanofiber/fiber/ceramic matrix based composites, especially for large structures, In-space fabrication, assembly and repair, etc.) TX12.4.2 - Intelligent Integrated Manufacturing (ex: Integration of smart sensors, controls, and measurement, analysis,							
decision support, and communication software tools for process control) TX12.4.3 - Electronics and Optics Manufacturing Process (ex: Advanced architecture nanoelectronics, Optical materials,							
components, structures, One dimension/two dimension (1D/2D) nanoelectronics, etc.) TX12.4.4 - Sustainable Manufacturing (ex: Removing hazardous materials from by-product of manufacturing processes, using							
green energetic compounds) TX12.4.5 - Nondestructive Evaluation and Sensors (ex: Special focus on increased sensitivity and selectivity, with reduced mass, power consumption and a smaller overall footprint)							
TX12.4.6 - Repurpose Processes (ex: Metals components as additive manufacturing feedstock, Packaging for building material, etc.) TX12.4.XX - (Other)				(Other)			
TX12.5 - Structural Dynamics	Product/Service Capability	Support of NASA	Support of NOAA	Product/Service Description	R&D	Primary Critical Mineral	Primary HTSUS 10-Digit Code
TX12.5.1 - Loads and Vibration (ex: Advanced fast coupled loads analysis tools, Development of variational coupled loads analysis techniques, etc.) TX12.5.2 - Vibroacoustics (ex: Advanced vibroacoustic model correlation techniques, Enhanced internal payload fairing							
acoustic environment modeling approaches, etc.) TX12.5.3 - Shock and Impact (ex: Impact blast and fragmentation assessment tools, Shock analysis methods and tools, etc.)							
TX12.5.4 - Test, Tools, and Methods (ex: Large structures operational modal analysis test techniques, Smart dynamic testing approaches inclusive of multi-input/multi-output techniques, etc.)							
TX12.5.XX - (Other)		TX13 - Ground, Tes	t, and Surface Systems	(Other)			
TX13.1 - Infrastructure Optimization	Product/Service Capability	Support of NASA	Support of NOAA	Product/Service Description	R&D	Primary Critical Mineral	Primary HTSUS 10-Digit Code
TX13.1.1 - Natural and Induced Environment Characterization and Mitigation (ex: Active and passive means to reduce acoustic energy associated with launch, Advanced flame trench surface materials, etc.) TX13.1.2 - Launch/Test/Ops Site Management (ex: Advanced flame trench surface materials, Collision avoidance and							
prognostics for cranes, Mobile launch pad kit, etc.) TX13.1.3 - Commodity Recovery (ex: Helium waste stream recovery, Hydrogen pooling mitigation, etc.)							
TX13.1.4 - Propellant Production, Storage and Transfer (ex: On-demand production of propellants, Thermal insulation systems, Toxic/green propellant storage and distribution, etc.) TX13.1.5 - Ground and Surface Logistics (ex: Counterfeit part countermeasures, Digital product lifecycle management,							
Supply chain and supplier economic resilience modeling, etc.) TX13.1.6 - Test, Operations, and Systems Safety (ex: Ground safety tools for radioactive payload processing robotic							
caretakers for hazardous operations/locations, automated alignment and coupling systems, On-demand, custom-fitted and lighter-weight Personnel Protective Equipment (PPE), etc.) TX13.1.7 - Impact/Damage/Radiation-Resistant Systems (ex: Carbon nanotube and graphene materials, Flexible structures,							
etc.)				(Other)			
etc.) TX13.1.XX - (Other) TX13.2 - Test and Qualification	Product/Service Capability	Support of NASA	Support of NOAA	(Other) Product/Service Description	R&D	Primary Critical Mineral	Primary HTSUS 10-Digit Code
etc.) TX13.1.XX - (Other) TX13.2 - Test and Qualification TX13.2.1 - Mechanical/Structural Integrity Testing (ex: Advanced non-conventional Schlieren techniques, Composite materials repair, Dynamic impact photogrammetry, etc.) TX13.2.2 - Propulsion, Exhaust, and Propellant Management (ex: Advanced techniques to scale up to a launch pad or engine	Product/Service Capability	Support of NASA	Support of NOAA		R&D	Primary Critical Mineral	Primary HTSUS 10-Digit Code
etc.) TX13.1.XX - (Other) TX13.2 - Test and Qualification TX13.2.1 - Mechanical/Structural Integrity Testing (ex: Advanced non-conventional Schlieren techniques, Composite materials repair, Dynamic impact photogrammetry, etc.) TX13.2.2 - Propulsion, Exhaust, and Propellant Management (ex: Advanced techniques to scale up to a launch pad or engine test stand environment, Rocket exhaust capture and filtration, Universal propellant servicing system, etc.) TX13.2.3 - Non-Destructive Inspection, Evaluation, and Root Cause Analysis (ex: Composite Overwrap Pressure Vessel	Product/Service Capability	Support of NASA	Support of NOAA		R&D	Primary Critical Mineral	Primary HTSUS 10-Digit Code
etc.) TX13.1.XX - (Other) TX13.2 - Test and Qualification TX13.2.1 - Mechanical/Structural Integrity Testing (ex: Advanced non-conventional Schlieren techniques, Composite materials repair, Dynamic impact photogrammetry, etc.) TX13.2.2 - Propulsion, Exhaust, and Propellant Management (ex: Advanced techniques to scale up to a launch pad or engine test stand environment, Rocket exhaust capture and filtration, Universal propellant servicing system, etc.) TX13.2.3 - Non-Destructive Inspection, Evaluation, and Root Cause Analysis (ex: Composite Overwrap Pressure Vessel (COPV) analysis technologies, Miniaturized robotic inspection devices, etc.) TX13.2.4 - Verification and Validation of Ground, Test, and Surface Systems (ex: Advanced high-speed photography, Augmented reality for design, process engineering, and test support, etc.)	Product/Service Capability	Support of NASA	Support of NOAA		R&D	Primary Critical Mineral	Primary HTSUS 10-Digit Code
tx13.1.xx - (Other) Tx13.2 - Test and Qualification Tx13.2.1 - Mechanical/Structural Integrity Testing (ex: Advanced non-conventional Schlieren techniques, Composite materials repair, Dynamic impact photogrammetry, etc.) Tx13.2.2 - Propulsion, Exhaust, and Propellant Management (ex: Advanced techniques to scale up to a launch pad or engine test stand environment, Rocket exhaust capture and filtration, Universal propellant servicing system, etc.) Tx13.2.3 - Non-Destructive Inspection, Evaluation, and Root Cause Analysis (ex: Composite Overwrap Pressure Vessel (COPV) analysis technologies, Miniaturized robotic inspection devices, etc.) Tx13.2.4 - Verification and Validation of Ground, Test, and Surface Systems (ex: Advanced high-speed photography, Augmented reality for design, process engineering, and test support, etc.) Tx13.2.5 - Flight and Ground Testing Methodologies (ex: Advanced overrun runway materials, Aerospace traffic control system, etc.)		Support of NASA	Support of NOAA		R&D	Primary Critical Mineral	Primary HTSUS 10-Digit Code
tx13.1.xx - (Other) Tx13.2 - Test and Qualification Tx13.2.1 - Mechanical/Structural Integrity Testing (ex: Advanced non-conventional Schlieren techniques, Composite materials repair, Dynamic impact photogrammetry, etc.) Tx13.2.2 - Propulsion, Exhaust, and Propellant Management (ex: Advanced techniques to scale up to a launch pad or engine test stand environment, Rocket exhaust capture and filtration, Universal propellant servicing system, etc.) Tx13.2.3 - Non-Destructive Inspection, Evaluation, and Root Cause Analysis (ex: Composite Overwrap Pressure Vessel (COPV) analysis technologies, Miniaturized robotic inspection devices, etc.) Tx13.2.4 - Verification and Validation of Ground, Test, and Surface Systems (ex: Advanced high-speed photography, Augmented reality for design, process engineering, and test support, etc.) Tx13.2.5 - Flight and Ground Testing Methodologies (ex: Advanced overrun runway materials, Aerospace traffic control system, etc.) Tx13.2.6 - Advanced Life-Cycle Testing Techniques (ex: Accelerated life testing, Adaptive systems, Built-in test enhanced life		Support of NASA	Support of NOAA		R&D	Primary Critical Mineral	Primary HTSUS 10-Digit Code
tx13.1.xx - (Other) Tx13.2 - Test and Qualification Tx13.2.1 - Mechanical/Structural Integrity Testing (ex: Advanced non-conventional Schlieren techniques, Composite materials repair, Dynamic impact photogrammetry, etc.) Tx13.2.2 - Propulsion, Exhaust, and Propellant Management (ex: Advanced techniques to scale up to a launch pad or engine test stand environment, Rocket exhaust capture and filtration, Universal propellant servicing system, etc.) Tx13.2.3 - Non-Destructive Inspection, Evaluation, and Root Cause Analysis (ex: Composite Overwrap Pressure Vessel (COPV) analysis technologies, Miniaturized robotic inspection devices, etc.) Tx13.2.4 - Verification and Validation of Ground, Test, and Surface Systems (ex: Advanced high-speed photography, Augmented reality for design, process engineering, and test support, etc.) Tx13.2.5 - Flight and Ground Testing Methodologies (ex: Advanced overrun runway materials, Aerospace traffic control system, etc.) Tx13.2.6 - Advanced Life-Cycle Testing Techniques (ex: Accelerated life testing, Adaptive systems, Built-in test enhanced life forecasting, etc.)		Support of NASA	Support of NOAA		R&D	Primary Critical Mineral	Primary HTSUS 10-Digit Code
etc.) TX13.2 - Test and Qualification TX13.2.1 - Mechanical/Structural Integrity Testing (ex: Advanced non-conventional Schlieren techniques, Composite materials repair, Dynamic impact photogrammetry, etc.) TX13.2.2 - Propulsion, Exhaust, and Propellant Management (ex: Advanced techniques to scale up to a launch pad or engine test stand environment, Rocket exhaust capture and filtration, Universal propellant servicing system, etc.) TX13.2.3 - Non-Destructive Inspection, Evaluation, and Root Cause Analysis (ex: Composite Overwrap Pressure Vessel (COPV) analysis technologies, Miniaturized robotic inspection devices, etc.) TX13.2.4 - Verification and Validation of Ground, Test, and Surface Systems (ex: Advanced high-speed photography, Augmented reality for design, process engineering, and test support, etc.) TX13.2.5 - Flight and Ground Testing Methodologies (ex: Advanced overrun runway materials, Aerospace traffic control system, etc.) TX13.2.6 - Advanced Life-Cycle Testing Techniques (ex: Accelerated life testing, Adaptive systems, Built-in test enhanced life forecasting, etc.) TX13.2.7 - Test Instruments and Sensors (ex: Ablation spectroscopy, Integrated, multi-parameter, ground-powered sensors for continuous monitoring, etc.) TX13.2.8 - Environment Testing (ex: Corrosion real-time and accelerated testing, Dust tolerant systems, Weather analysis, etc.) TX13.2.XX - (Other)				Product/Service Description (Other)

Previous Page Section 2g: Technology Taxonomy Areas 14 - 18: Thermal Management Systems; Flight Vehicle Systems; Air Traffic	c Management and Range Traff	ficking Systems; Guidance, C	Control, and Navigation (GC&N);	Not Specified/Other Technology Taxonomy Area			Next Page
For each Technology Taxonomy subarea identified in Section 2a, specify your organization's capabilities by selecting an option Taxonomy subarea for which your organization has capabilities and indicate whether your organization carries out Research organization. If the product contains any critical minerals, identify the primary critical mineral used (based on estimated level)	h & Development (R&D) for the g	iven product/service. NOTE, in	nternal R&D is performed in-hous	se by the organization, while external R&D is contracted	d out or otherwise out-sou	rced to another company or	
does not import." in the cell to the right. TX14.1 - Cryogenic Systems	Product/Service Capability	TX14 - Thermal M	lanagement Systems Support of NOAA	Product/Service Description	R&D	Primary Critical Mineral	Primary HTSUS 10-Digit Code
TX14.1.1 - In-space Propellant Storage and Utilization (ex: Low conductive heat-load structure, Micro-g fluid dynamics (2-phase transport, surface wetting, surface tension, evaporation condensation), etc.) TX14.1.2 - Launch Vehicle Propellant (ex: Composite structures and components and lines for cryogenic application,				·			, ,
Vehicle feedline chill and operation, etc.) TX14.1.3 - Thermal Conditioning for Sensors, Instruments, and High Efficiency Electric Motors (ex: Cryocooler refrigeration above and below 10 K, Liquid hydrogen spacecraft dewars, Vapor cooling for instruments and storage							
hardware, etc.) TX14.1.4 - Ground Testing and Operations (ex: Advanced thermal insulation systems and concepts, Cryogenic pumps, Densification of propellants/fluids at small and large scale (cooling below the normal boiling point (NBP)), etc.)							
TX14.1.5 - Cryogenic Analysis, Safety and Properties (ex: Cryogenic systems, Cryogenic propellant/fluid safety oxygen, Material properties testing apparatus (strength, thermal/electrical conductivity, and emissivity), etc.) TX14.1.XX - (Other)				(Other)			
TX14.2 - Thermal Control Components and Systems TX14.2.1 - Heat Acquisition (ex: Boiling heat transfer, Cold plates and evaporators, High heat load collection (500 kW - 1	Product/Service Capability	Support of NASA	Support of NOAA	Product/Service Description	R&D	Primary Critical Mineral	Primary HTSUS 10-Digit Code
MW), etc.) TX14.2.2 - Heat Transport (ex: Capillary pumped fluid loops and loop heat pipes, Forced air cooling (heating, ventilation, and air conditioning (HVAC)), etc.) TX14.2.3 - Heat Rejection and Storage (ex: Autonomous radiator maintenance, Phase change materials, Transpiration							
cooling, etc.) TX14.2.4 - Insulation and Interfaces (ex: Aerogels, Foam insulations, Multi-layer insulations, etc.) TX14.2.5 - Thermal Control Analysis (ex: Fluid flow analysis, Orbit analysis, Thermal solvers, etc.)							
TX14.2.6 - Heating Systems (ex: Electric heaters, Nuclear-based heating source (e.g. radioisotope heater units, general-purpose heat source), etc.) TX14.2.7 - Verification and Validation of Thermal Management Systems (ex: Testing, correlation, and inspection)							
TX14.2.8 - Measurement and Control (ex: Mechanical thermostats, Sensors, Temperature control software and algorithms, etc.) TX14.2.XX - (Other)				(Other)			
TX14.3 - Thermal Protection Components and Systems TX14.3.1 - Thermal Protection Materials (TPM) (ex: Coatings, Foams (i.e., ascent Thermal Protection Systems (TPSs)), Tiles and blankets, etc.)	Product/Service Capability	Support of NASA	Support of NOAA	Product/Service Description	R&D	Primary Critical Mineral	Primary HTSUS 10-Digit Code
TX14.3.2 - Thermal Protection Systems (ex: Ceramic matrix composite hot structures, Multilayer flexible (e.g., Hypersonic Inflatable Aerodynamic Decelerator (HIAD) thermal protection system), etc.) TX14.3.3 - Thermal Protection Analysis (ex: Aeroheating (convective and radiative), Computational materials design,							
Reliability assessment and failure analysis, etc.) TX14.3.4 - Thermal Protection Systems Testing (ex. Arc jet, laser-based, wind tunnel, solar tower, radiant, thermomechanical, pressurized elevated temperature, and combined (e.g., Laser Enhanced Arc-jet Facility (LEAF) Lite) flight							
testing, etc.) TX14.3.5 - Thermal Protection System Instrumentation (ex: Heat flux gauges, Radiometer/spectrometers, Sensor networks, etc.) TX14.3.XX - (Other)				(Other)			
TX15.1 - Aerosciences	Product/Service Capability	TX15 - Flight Support of NASA	Vehicle Systems Support of NOAA	Product/Service Description	R&D	Primary Critical Mineral	Primary HTSUS 10-Digit Code
TX15.1.1 - Aerodynamics (ex: Flow characterization through analysis and testing, with prediction and characterization of unsteady separated flow being a primary technology challenge, etc.) TX15.1.2 - Aerothermodynamics (ex: Forebody and afterbody heating characteristics with heating prediction on capsule							
afterbodies in separated flow, Shock layer radiation prediction and characterization; advanced predictive technology, etc.) TX15.1.3 - Aeroelasticity (ex: Computational aeroelastic tools coupling Computational Fluid Dynamics (CFD) with structural							
dynamics methodologies to predict flutter, buffet, limit cycle oscillations and aeroservoelastic interactions, etc.) TX15.1.4 - Aeroacoustics (ex: Integrated approach to computational predictive methods, sensors, and test techniques to study aeroacoustic effects generated by shock motion, flow separation and reattachment, exhaust plumes and plume							
impingement, and sonic booms, etc.) TX15.1.5 - Propulsion Flowpath and Interactions (ex: Technology challenges include prediction and characterization of flow-related performance for integrated propulsion systems, etc.)	•						
TX15.1.6 - Advanced Atmospheric Flight Vehicles (ex: Concept flow-related technologies supporting development of subsonic transports, supersonic transports, hybrid electric concepts, advanced spacecraft, launch vehicle and abort vehicles, etc.) TX15.1.7 - Computational Fluid Dynamics (CFD) Technologies (ex: Advanced algorithms and computational strategies							
allowing predictive and design tools to operate efficiently on emerging high performance computing architectures, Particle methods like Lattice Boltzmann, etc.) TX15.1.8 - Ground and Flight Test Technologies (ex: Advanced pressure and temperature measurement, qualitative and							
quantitative off-body measurement techniques, advanced static and dynamic pressure sensitive paint, advanced load balances, including flow-through balances for powered testing, and model deformation measurement systems for aeroelastic test, etc.)							
TX15.1.XX - (Other) TX15.2 - Flight Mechanics	Product/Service Capability	Support of NASA	Support of NOAA	(Other) Product/Service Description	R&D	Primary Critical Mineral	Primary HTSUS 10-Digit Code
TX15.2.1 - Trajectory Design and Analysis (ex: Trajectory Design and Optimization & Trajectory Reconstruction; Includes design and optimization of space vehicle and air vehicle trajectories. Includes definition of the envelope of acceptable trajectories given the capabilities of the vehicle, and determination of the optimal trajectory, etc.)							
TX15.2.2 - Flight Performance and Analysis (ex: Technologies and techniques for the analysis, design, and prediction of vehicle performance parameters and evaluation against vehicle and mission requirements and constraints, such as 3DOF analyses for preliminary designs and trade studies followed by high fidelity 6-DOF evaluations with GN&C in the loop)							
TX15.2.3 - Flight Mechanics Testing and Flight Operations (ex: Technologies to aid in-flight and post-flight assessments of vehicle performance and handling such as trajectories and environments, technology development of sensors and systems to gather relevant flight data during flight tests and operational flights, etc.) TX15.2.4 - Modeling and Simulation for Flight (ex: Development of technologies that simulate the physics of flight vehicles,							
including GN&C, natural environment models, and vehicle subsystem (plant) models that affect vehicle performance and dynamics; Uncertainty modeling, Simulation and trajectory visualization, etc.)				(Ott)			
TX15.2.XX - (Other) TX16 - Air Traffic Management and Range Tracking Systems	Product/Service Capability	TX16 - Air Traffic Managemen	nt and Range Tracking Systems Support of NOAA	(Other) Product/Service Description	R&D	Primary Critical Mineral	Primary HTSUS 10-Digit Code
TX16.1 - Safe All Vehicle Access (ex: Multi-domain situational awareness and prognostic safety awareness, prediction and alerting tools, Safety technologies for new vehicle concepts, Urban Air Mobility (UAM) viability demonstrations, etc.)							
TX16.2 - Weather/Environment (ex: Improved weather and hazard awareness detection, prediction and alerting technologies, including aircraft state and health management, etc.) TX16.3 - Traffic Management Concepts (ex: Operator prioritization services integrated with air navigation service provider							
tools, Safety analyses for new airspace concepts, etc.) TX16.4 - Architectures and Infrastructure (ex: Develop requirements for a secure integrated CNS (Communications, Navigation, Surveillance) system for Trajectory Based-Operations (TBO) and future autonomous operations, etc.) TX16.5 - Range Tracking, Surveillance, and Flight Safety Technologies (ex: Advanced (near-zero loss) telemetry systems							
for ascent or re-entry, Autonomous onboard flight analysis, etc.) TX16.6 - Integrated Modeling, Simulation, and Testing (ex: ATM testbed, Shadow-mode capability in which virtual and constructive simulations run in tandem with the live NAS, etc.)							
TX16.XX - (Other)	Product/Service Capability		ation, and Control (GN&C)	(Other)	R&D	Primary Critical Mineral	Drives v. LTCLIC 10 Digit Code
TX17.1 - Guidance and Targeting Algorithms TX17.1.1 - Guidance Algorithms (ex: Ascent guidance, abort guidance, and multi-vehicle formation flying guidance, Vehicle 6DOF path planning, etc.)	, ,	Support of NASA	Support of NOAA	Product/Service Description	Rab	Primary Crucal Mineral	Primary HTSUS 10-Digit Code
TX17.1.2 - Targeting Algorithms (ex: On-the-fly adaptive guidance for opportunistic exploration and science observation) TX17.1.XX - (Other)				(Other)			
TX17.2 - Navigation Technologies TX17.2.1 - Onboard Navigation Algorithms (ex: Algorithms for optical navigation, Ascent vehicle filter, Light detection and ranging (LIDAR)-based navigation, etc.)	Product/Service Capability	Support of NASA	Support of NOAA	Product/Service Description	R&D	Primary Critical Mineral	Primary HTSUS 10-Digit Code
TX17.2.2 - Ground-based Navigation Algorithms (ex: Filtering and estimation technologies for the optimum selection of data types, Measurement frequencies and advanced techniques/methods for uncertainty analysis, etc.) TX17.2.3 - Navigation Sensors (ex: Accelerometers, Inertial Measurement Units (IMUs), GPS/Global Navigation Satellite							
System (GNSS) receivers, etc.) TX17.2.4 - Relative Navigation Aids (ex: Retro-reflective corner cubes, Radio Wave Marker (RF Retro-Reflector), etc.) TX17.2.5 - Rendezvous, Proximity Operations, and Capture Sensor Processing and Processors (ex: LIDAR calibration, Marman Ring tracking, Vis. Cam. Vehicle Centroid/Bearing; IR cam. Vehicle Centroid/Bearing; Retroreflector Centroid							
Bearing; Landmark (i.e. crater) Bearing; Terrain Feature Bearing; Laser Retro Range & Bearing; Laser Vehicle Range & Bearing, etc.) TX17.2.6 - Rendezvous, Proximity Operations, and Capture Trajectory Design and Orbit Determination (ex:							
Geosynchronous Earth Orbit (GEO) RPO trajectory design and orbit determination, Lunar Near Rectilinear Halo Orbit (NRHO) RPO trajectory design and orbit determination, etc.) TX17.2.XX - (Other)				(Other)			
TX17.3 - Control Technologies TX17.3.1 - Onboard Maneuvering/Pointing/Stabilization/Flight Control Algorithms (ex: Adaptive flight control for launch	Product/Service Capability	Support of NASA	Support of NOAA	Product/Service Description	R&D	Primary Critical Mineral	Primary HTSUS 10-Digit Code
vehicles/spacecraft/landers/atmospheric exploration vehicles time optimal (or fuel optimal) spacecraft slew control, Clohessy-Wiltshire (CW) Targeted Finite Burn, etc.) TX17.3.2 - Dynamics Analysis, Modeling, and Simulation Tools (ex: Flexible modes analysis, Flexible multi-body dynamics modeling tools/codes, Multi-vehicle closed loop hi-fidelity Altitude and orbit simulation, etc.)							
TX17.3.3 - Ground-based Maneuvering/Pointing/Stabilization/Flight Control Algorithms (ex: Algorithms for ground-based maneuver design, in a highly-automated manner) TX17.3.4 - Control Force/Torque Actuators (ex: Cold-gas Altitude control micro-thrusters, Next generation reaction wheels,							
Precision delta-v thrusters, etc.) TX17.3.5 - GN&C actuators for 6DOF Spacecraft Control During Rendezvous, Proximity Operations, and Capture (ex: 6DOF RCS thrusters)							
TX17.3.XX - (Other) TX17.4 - Altitude Estimation Technologies TX17.4.1 - Onboard Altitude/Altitude Rate Estimation Algorithms (ex: Kalman filters, Relative pose estimators)	Product/Service Capability	Support of NASA	Support of NOAA	(Other) Product/Service Description	R&D	Primary Critical Mineral	Primary HTSUS 10-Digit Code
TX17.4.2 - Ground-Based Altitude Determination/Reconstruction Algorithm Development (ex: Sparse data trajectory reconstruction tools, Orbit determination tools/codes for formation flying spacecraft constellations) TX17.4.3 - Altitude Estimation Sensors (ex: Celestial sensors, Gyroscopes, Star trackers, etc.)							
TX17.4.XX - (Other) TX17.5 - GN&C Systems Engineering Technologies	Product/Service Capability	Support of NASA	Support of NOAA	(Other) Product/Service Description	R&D	Primary Critical Mineral	Primary HTSUS 10-Digit Code
TX17.5.1 - GN&C System Architectures, Requirements and Specifications (ex: GN&C system architectural trade analysis tools/codes, Multi-parameter system optimization tools/codes) TX17.5.2 - GN&C Fault Management/Fault Tolerance/Autonomy (ex: Proximity operations (Collision Detection (RPO), Collision Avoidance Maneuver design (GEO), Collision Avoidance Maneuver							
design (Deep Space), etc.) TX17.5.3 - GN&C Verification and Validation Tools and Techniques (ex: Technologies for the verification and validation of highly autonomous systems)							
TX17.5.4 - GN&C Ground Testbeds/Test Facilities (ex: GN&C system autonomy assessment testbeds, high-precision pointing and micro-vibration jitter assessment testbeds) TX17.5.5 - Vehicle Flight Dynamics and Mission Design Tools/Techniques (ex: Computationally efficient trajectory and							
Altitude optimization tools for onboard use, Improved trajectory and mission design tools and visualization methods for faster trajectory, vehicle, and mission design cycles) TX17.5.6 - System Identification (ex: Computationally efficient algorithms for embedded online real time parameter astimation. Prediction error minimization (PEM) tools, codes, and algorithms, etc.)							
estimation, Prediction-error minimization (PEM) tools, codes, and algorithms, etc.) TX17.5.7 - End-to-End Modeling and Simulation of GN&C Systems (ex: GN&C modeling and simulation for increased autonomy, Technologies, techniques, and methods for modeling non-deterministic systems, etc.) TX17.5.8 - Flying/Handling Qualities (ex: Advanced tools for designing-in desired handling qualities and for evaluating							
handling qualities for piloted space vehicles; Tools for assessing pilot workloads, pilot performance, and handling qualities for advanced air and space vehicles (e.g. vehicles with increased structural flexibility, vehicles with increased levels of automation/autonomy))							
TX17.5.9 - Onboard and Ground-Based Terrain and Object Simulation, Mapping, and Modeling Software (ex: Terrain digital elevation map or three dimensional (3D) model generation (offline), Vehicle 3D model generation) TX17.5.XX - (Other)				(Other)			
TX17.6 - Technologies for Aircraft Trajectory Generation, Management, and Optimization for Airspace Operations TX17.6.1 - Strategic Management of Air Vehicles (ex: Algorithms, ground software, and onboard software for improved traffic flow management and operations optimization for air vehicles)	Product/Service Capability	Support of NASA	Support of NOAA	Product/Service Description	R&D	Primary Critical Mineral	Primary HTSUS 10-Digit Code
TX17.6.2 - Tactical Management of Air Vehicles (ex: Algorithms, ground software, and onboard software for separation assurance and conflict resolution for air vehicles) TX17.6.XX - (Other)				(Other)

Section 4: Supplier Information Provide information about your organization's suppliers. This section must be completed in its entirety with at least one supplier per product/service. Blank responses will not be accepted. First, estimate the total number of direct suppliers your organization uses to produce its products and services in the box to the right. See the Definitions Tab for more information. Estimate your organization's total number of direct suppliers in 2022 (see Definitions Tab): For each of the product and services, identify the top suppliers (up to three) and provide the following: name of the supplier, associated zip/postal code, country, primary reason of significance, the Technology Taxonomy subarea of input sourced from the supplier (and/or the critical product and service input sourced from the supplier, if applicable), a brief description of the input provided by the supplier sourcing criticality. If the primary reason for supplier is listed as other, utilize the explain box to provide a response. NOTE: Do NOT paste information into this excel document. Your Organization's Technology Taxonomy Subarea of Input Sourced | Critical Product/Service Input Sourced | Primary Reason Supplier is Products and Services Supplier Sourcing Critic Supplier Name from Supplier from Supplier Supplier Product/Service Input Description ZIP or Postal Code (generated from Sections 2b-g and 3 responses) applicable) (if applicable) Sole Global Source Delivery Considerations U.S. - Single Source Financial Considerations

Per Section 705(d) of the Defense Production Act

C. Use the following links to advance directly to a specific agency/program:

Next Page Section 6: Support of U.S. Government (USG) - Agencies & Space Related Programs

Identify all U.S. Government agencies that your organization has supported, directly or indirectly, from 2019-2022 (including all affiliated laboratories or federally funded research and development centers). Then, identify the primary and secondary (if applicable) product/service that your organization provides to each agency. If your organization does not support the listed agency, select "None" from the Support Type dropdown menu.

	Agency Name	Support Type	Primary Product/Service Provided (generated from Sections 2b-g and 3 responses)	Secondary Product/Service Provided (if applicable)
National Aeronautics and Space Administration (Na	ASA)	Space Related		
National Oceanic and Atmospheric Administration	(NOAA)	Non-Space Related		
Federal Aviation Administration (FAA)		Both		
Federal Communications Commission		None		
National Laboratories (DOE Labs)		Unknown		
U.S. Air Force (USAF)				
U.S. Army				
U.S. Coast Guard				
U.S. Marine Corps (USMC)				
U.S. Navy				
U.S. Space Force (USSF)				
U.S. DOD Defense Advanced Research Projects A	Agency (DARPA)			
U.S. DOD Missile Defense Agency (MDA)				
U.S. Intelligence Community (e.g. CIA, NGA, NRO,	, NSA, DNI, etc.)			
U.S. Space Development Agency (SDA)				
Defense Logistics Agency (DLA)				
Other Agency	(Identify Agency)			
Other Agency	(Identify Agency)			
Other Agency	(Identify Agency)			
Unlisted Agency	(Specify here)			
Unlisted Agency	(Specify here)			

B. Estimate the total number of Commercial, USG, and space related programs your organization has directly or indirectly supported from 2019-2022 (including those not listed below):

If your organization entered "0," proceed to Section 7. Then, select the

Other: Identify (#324-333)

From the list provided, identify all Commercial, USG, and space related program(s) your organization has supported, directly or indirectly, from 2019-2022 and indicate how your organization supported each program. NOTE: STTR/SBIR are considered "prime" contracts. top (using your own discretion/best judgment) three products/services provided in support of each program (from Sections 2b-g and 3), the key supplier your organization uses to support each program (if applicable), and the primary customer you work with in supporting each program (if your organization is a subcontractor).

NASA: (#1-217)

If your organization participates in a USG and space related program that is not listed below, enter it manually at the bottom of this page (entries 324-333). In these cases, identify the relevant agency in the "U.S. Government Agency" column and then write-in the program in the 'Program Name' column, along with answering the other column questions about the program(s) supported. If your organization has more than ten non-listed programs to enter, enter the ten most important programs to your organization.

NOAA: (#218-221)

Launch Vehicles: (#222-238)

<u>Space Force</u>: (#239-282)

<u>Air Force: (#283-320)</u>

			Top Product/Service (generated from Sections 2b-g and 3 responses) Supporting USG Programs			Primary Supplier	If Subcontractor, select Primary

Section 9: U.S. Export Control Regulations Indicate whether your organization is subject to U.S. export control regimes (Export Administration Regulations (ITAR)) for the export of space related products or services. Identify the frequency of regime use (including export control regime applications and/or licenses), the primary Commerce Control List (CCL) or United States Munitions List (USML) category used, and your primary challenge with export control regimes. For additional information on export licensing, including EAR and ITAR, see the following link: https://www.bis.doc.gov/index.php/documents/technology-evaluation/781-export-licensing/file. Export Control Number of Unique ECCNs Used to Export EAR - Primary Commerce Control List Primary Challenge Encountered 2019 - 2022 (CCL) Category Regime If your organization is not subject to any U.S. export control regimes for the export of EAR Not Applicable. Our space-related products space related products or services, select "Not Applicable. Our space related products and or services are not subject to export and or services are not subject to export controls" in the box to the right and proceed to Number of Unique USMLs Used to Export ITAR - Primary United States Munitions Primary Challenge Encountered List (USML) Category 2019 - 2022 ITAR Since 2019, indicate your organization's top five non-U.S. space related customers by revenue and provide the required information. Estimates are acceptable for the percentage of space related annual total sales attributable to each customer. If the HTSUS 10-digit code associated with the exported product is unavailable, provide the HTS 8-digit or HS 6-digit code instead. Primary HTSUS 10-Digit Code Primary Product/Service Average Percent of Annual Total Sales **Customer Country** Customer Name Customer Type Attributable to Customer Since 2019 (generated from Sections 2b-g and 3 responses) (if known) Commercial Company Country List Foreign Government Intergovernmental Agency Non-Government Organization (NGO) University Indicate the number of deemed export licenses your organization obtained between 2019-2022. If none, enter 0. For deemed export licenses associated with your organization, indicate the country with the **greatest number of deemed exports** (including those with no license required) between **2019-2022**. Country List Have deemed export regulations caused non-U.S. students, faculty members, or employees to avoid research or other work activities within space related fields at your organization? Yes/No, Unknown, NA Have U.S. export controls caused your organization to limit the scope of its space related research project(s)? Yes/No, Unknown, NA Indicate up to five Export Control Classification Numbers (ECCNs) or USML classifications (or subcategories, if exact classification is unknown) that your organization would like to see revised. For each ECCN or USML classification, provide the product most impacted by current export controls, the suggested revision, and an explanation of the revision. My organization does not have any desired changes If your organization does not have any desired changes, select "My organization does not have any desired changes" in the box to the right. Most Impacted Product/Service ECCN or USML Suggested Revision Explanation of Revision (generated from Sections 2b-g and 3 responses) Classification Reclassify commodity to a new ECCN or USML classification Reclassify commodity to another existing ECCN or USML classification Remove from CCL or USML entirely Revise ECCN or USML classification to reflect new technological developments Revise ECCN's or USML classification's technical definitions or terms to increase clarity Revise ECCN or USML classification to include an exception for a specific _____ commodity Comments: BUSINESS CONFIDENTIAL - Per Section 705(d) of the Defense Production Act

Costs associated with export control compliance Difficulty finding export control subject matter experts Outdated regulation Overly burdensome licensing process Program delays due to export compliance Unclear or confusing regulation Unilateral USG export control No challenged encountered Category 0 - Nuclear Materials Facilities & Equipment [and Miscellaneous Items] Category 1 - Materials Chemicals Microorganisms and Toxins Category 2 - Materials Processing Category 3 - Electronics Design Development and Production Category 4 - Computers Category 5 Part 1 - Telecommunications Category 5 Part 2 - Information Security Category 6 - Sensors and Lasers Category 7 - Navigation and Avionics Category 8 - Marine Category 9 - Aerospace and Propulsion Category I - Firearms and Related Articles Category II - Guns and Armament Category III - Ammunition and Ordnance Category IV - Launch Vehicles, Guided Missiles, Ballistic Missiles, Rockets, Torpedoes, Bombs, and Mines Category V - Explosives and Energetic Materials, Propellants, Incendiary Agents, and Their Constituents Category VI - Surface Vessels of War and Special Naval Equipment Category VII - Ground Vehicles Category VIII - Aircraft and Related Articles
